In our online store, we offer a selection of covers that are characterized by their ease of care and suitability for outdoor use. These covers are chosen 90% of the time because they offer an ideal combination of functionality, feel and comfort. You can easily make your selection using the “Vondom cover” feature.

Of course, we can offer you all covers from the Vondom collection on request. These covers, which are not available in our online store, are particularly suitable for use in regions with a predominantly sunny and dry climate or for indoor use. They impress with their particularly luxurious feel, but usually require more maintenance if soiled.

Product description

Pal, as the name suggests, is a friendly and modern design line of indoor and outdoor furniture by Karim Rashid for the Spanish brand Vondom. This collection is a selection of exclusive, minimalist and colorful collections of design furniture. The minimalist iconic shape at the front of the object turns over, creating a constant flow of similarity between the different objects in this series. The Pal stool is multifunctional - it provides space for storage and when folded down it becomes a small side table, which together with a second one becomes an even larger coffee table; There is a hole in the side floor plan that serves as storage space. The series is completed with planters, tables and versatile chairs that add an avant-garde touch to any room. Unique in its class, the Pal collection, made of rotationally molded polyethylene resin, introduces you to a new aesthetic concept for indoor and outdoor furniture. These designs are ideal for hotels or private homes.

about Vondom

easier to move the planter. The watering system ensures perfect care for your plants. The watering system is designed for indoor use only and is not suitable for outdoor use.

Indoor or outdoor use?
Illuminated planters have an integrated and lockable water drain. This means they can be used both indoors and outdoors. Planters without lighting do not have integrated water drainage. When used outdoors, several holes must be drilled with a drill both in the base of the planting area and in the subsoil on which the planter stands to prevent waterlogging.
