Product information

Dimensions / Technical Data:

Maße ca.: Breite 38cm, Tiefe 89cm, Höhe 230cm

Duschkopf: Verchromter Kunststoff mit Tropfschutz und Silikondüsen zur einfachsten Reinigung

Mischbatterie: Edelstahl, Druckknopf mit Taktgeber (Dauer des Wasserstrahls einstellbar)

Lieferbare Farben: Siehe Farbpalette

Struktur & Oberfläche:
Dusche wahlweise matt durchgefärbtes ABS mit PMMA-Schicht (Poleasy) oder glänzend lackiert
Bodenplatte generell matt durchgefärbtes ABS mit PMMA-Schicht

Besonderheit:
System zur Wassereinsparung bis zu 50%
Für den Indoor- und Outdoorbereich geeignet
Für Warm- und Kaltwasserbetrieb geeignet
UVI-widerstandsfähig.
Widerstandsfähig gegenüber Temperaturen (-60ºC bis +80 ºC)
Stoß- und verschleißfest.
Hervorragende mechanische Eigenschaften

Bodenplatte: Mit rutschhemmendem, leicht zu reinigendem Acrylüberzug inkl. Profilen zur Rückhaltung des Sandes und integriertem Wasserablauf.

Design: Moredesign

Product description

The Dyno shower is available in all colors for both the embossed print or painted versions. The base is made with ABS and it has special profiles that make keeping sand out possible. It is covered with an acrylic film to make the cleaning operations more comfortable and safe. Dyno is equipped with a drip free showerhead in chromium-plated plastic, with a system that enables you to save 50% on water and with a silicone nozzle that can easily and simply be wiped clean. The mixer is the only stainless steel element with a timer that enables you to control the water jet in terms of times. The normal version with cold and hot water that comes from the main water line is suitable for indoor and outdoor use.

MyYour - Material & Care

POLEASY:
Design and technology are not the only factors that make the difference in Myyour products: also because, as far as the materials are concerned, this company, which is based in Padua, Italy, is able to fully express itself thanks to a new and special type of polyethylene called Poleasy. Poleasy was developed after long years of research. In fact our research was focused on finding a way to eliminate the

Product information

microporous surfaces that are responsible for the formation of anti-aesthetic patinas or cracks over time. Poleasy, an exclusively international patent, has entirely solved this problem by ensuring compactness to the surfaces of Myyour’s creations and a better performance in terms of durability, washability and color brightness.

ROTATIONAL:
At Myyour, the rotational molding of polyethylene goes beyond the purely technical aspect. It becomes a process that is strongly connected to the best traditions of craftsmanship. It is here that man, hands and time encounter the ancient gestures and rhythms that enable them to act intelligently and in synergy with machines as to attain perfection. The skillful blend of powders, the rotation of the molds, which rotate for almost an hour to favor the creation of an appropriate thickness, the hot extraction process of the manufactured item and its dimensional stabilization, which is obtained through custom made templates, are all very slow and delicate phases of the process. These phases are scrupulously and skillfully managed to prevent errors from cropping up. The product is finished manually before finally being blazed to create a smooth and shiny creation.

COATING:
This goal seemed almost impossible to attain a few years ago. Today, coating polyethylene has become a wonderful reality: dense and compact, smooth and almost metallic-like... it embellishes and greatly impacts Myyour products. This was made possible thanks to the scientific research, tests and experiments that brought to light the right formula. We have now obtained a primer that of plastic and to ensure a durable application on smooth surfaces and without ever having to drill a hole. After applying this unique background layer, each piece is carefully sanded by hand: three careful coatings are sprayed on the product and a trip to the oven does the rest. All of this contributes to the much desired and beautiful colors of Myyour, which are weather resistant and able to remain intact over a long, long period of time.

About My Your

MY YOUR is a story, a family and an Italian design company.
MY YOUR has evolved over time, changing and improving its design and introducing technological innovations hand in hand with its brand identity. Today MY YOUR presents its new and consolidated identity as a publisher and manufacturer of furniture and accessories that help create spaces with a strong personality, without ever neglecting the elegance of form and qualitative excellence. MY YOUR is designed and produced entirely in Italy, both as a brand and as the aesthetic and functional language of the outdoor collections.
