Design: Karim Rashid

**Product description**

Pal is, as the name suggests, a friendly and modern design line for indoor and outdoor furniture by Karim Rashid for the Spanish brand Vondom. This collection is a selection of exclusive, minimalist and colorful collections of design furniture. The minimalist iconic shape at the front of the object turns around, creating a constant flow of similarity between the different objects in this series. The Pal stool is multifunctional - it provides space for storage and when folded down it becomes a small side table, which together with a second one becomes an even larger coffee table; there is a hole in the side plan that serves as storage space. The series is completed by planters, tables and versatile chairs that add an avant-garde touch to any room. Unique in its class, the Pal collection, made of rotationally molded polyethylene resin, introduces you to a new aesthetic concept for indoor and outdoor furniture. These designs are ideal for hotels or private homes.

**Watering system & integrated wheels:**
Planters with a self-watering system are usually supplied with integrated wheels up to a size of 60cm. The integrated wheels make it easier to move the planter. The watering system ensures perfect care for your plants. The watering system is designed for indoor use only and is not suitable for outdoor use.

**Indoor or outdoor use?**
Illuminated planters have an integrated and lockable water drain. This means they can be used both indoors and outdoors. Planters without lighting do not have integrated water drainage. When used outdoors, several holes must be drilled with a drill both in the base of the planting area and in the subsoil on which the planter stands to prevent waterlogging.
