In the "American walnut" version, the entire bench is made of American walnut.

Design: Matthias Hahn 2013

Product description

The E8-BANK complements Mathias Hahn's table of the same name; the dimensions of the bench are coordinated so that the bench can also be slid under the table between the table legs to save space. "The bench deliberately has no overhangs like the table because I didn't want to make a copy of the table in bench form," explains designer Mathias Hahn.

A complex color staining technique creates a semi-transparent look and leaves the natural structure and depth of the oak wood visible. The surface treatment requires manual dexterity and can therefore not be automated. A special staining technique is applied in several work steps. Since the microstructure of the surface is not smooth but brushed, the stained wood appears naturally matt despite its coloration.

The color glaze for the colors zinc yellow and poppy differs significantly in appearance and technique from the color stain. It remains on the surface, so it does not penetrate into the wood. It differs from an opaque color varnish in that it leaves the wood structure

About Zeitraum

Home:

ZEITRAUM is at home in the Bavarian foothills of the Alps. It is not so much the local roots that connect ZEITRAUM with our homeland, but rather the knowledge that life in the alpine region has traditionally been characterized by the conscious use of limited resources. The direct dependence on nature shapes ZEITRAUM's sense of responsibility and long-term thinking. The roots of the values lie in the respectful treatment of the natural habitat, which should be preserved for future generations in its diversity as a basis for life and a source of inspiration.

Longevity:

ZEITRAUM's designs are a tribute to the pure, the purity of the material and the durability of the form. Out of conviction, ZEITRAUM is committed to sustainable action in its entirety, and is committed to the principle that products are repairable, because this is the only way to ensure their longevity over generations. Repairing and maintaining deepens the relationship between man and product. ZEITRAUM has been pursuing the idea of combining design and ecology since its founding in 1990. ZEITRAUM processes only hardwoods from sustainable forestry and does not use any chemical treatment of the wood. The surfaces, left open-pored with biological oils, allow the furniture to breathe and retain its naturalness.
