Design: Studio Vondom

Product description

VONDOM has taken another step of development in the world of luminaires with the presentation of the collection 'THESECONDLIGHT'.

THESECONDLIGHT luminaires are composed of two parts: the luminous body in polyethylene resin and the base in 316 L stainless steel. You can choose between an energy saving lamp or RGB LEDs; this last option is supplied together with a remote control for programming the colors and the different variants. Thanks to the IP65 protection and the use of LEDs, the lights of the series 'THESECONDLIGHT' can be used both indoors and outdoors, giving a touch of freshness and modernity to any environment.
