Product information

Dimensions / Technical Data:

Forest set of 3 consists of:
Forest 100: Width 50cm, Depth 40cm, Height 100cm
Forest 150: Width 75cm, Depth 60cm, Height 150cm
Forest 200: Width 100cm, Depth 70cm, Height 200cm

Diffusor: Linear polyethylene, translucent, weatherproof + unbreakable

Foot: With height-adjustable feet

Illumination: LED white 4000-4500 Kelvin or multi colour 6500 Kelvin, 16-72 Watt max. depending of model, Power supply IN: 100-240 Volt AC, 50-60 Hz

Illumination available:
LED white, 4000 - 4500 Kelvin
LED-RGB illumination with remote control
LED-RGB illumination with remote control and battery + charger. Charging time 4 hours, operating time 6 hours, 500 cycles
LED-RGB DMX illumination with remote control (WIFI Access Point needed)
LED-RGB DMX illumination with remote control and accu + charger. Charging time 4 hours, operating time 6 hours, 500 cycles (WIFI Access Point needed)

Remote Control: Reach 10-15 Meters

Protection class: IP65

Cable supply: 2 meter, white (plug optional for EU, AUS, UK or USA)

Characteristic:
Suitable for use in indoor and outdoor areas
With lockable drainage for indoor use
Very suitable for professional use in restaurants and offices
UVI-resistant. Factor UV8, equal to 8,000 hours of sunshine in Florida
Resistant to temperatures (-60 ° C to + 80 ° C)
Shock and wear resistant. 100% reusable

Available accessories: DMX Wireless Home WIFI Access Point

DMX Home WIFI is an Acces Point through which you can control all VONDOM products with an IOS or Andriod tablet or smartphone. You can create individual and special environments. Control the entertainment lighting of each Vondom product, such as Furniture, planters and lights individually or in a group. We are happy to advise you in detail, call us.

Design: Teresa Sapey

Product description

Ramón Esteve has designed for Vondom FOREST, an illuminated object shaped after a geometric abstraction of a Christmas tree. The clean, crisp lines make FOREST a sober, timeless addition. The interior lighting with LED white or RGB LED lamp system creates an ambient atmosphere through the use of light and color, which can be adjusted depending on the desired moment and atmosphere. Forest is perfect for indoor and outdoor use. A magic tree that invites you to immerse yourself in the pure, beautiful nature together with your loved ones and stay in this "illuminated forest" for a special occasion like Christmas.

FAQ Forest

VONDOM FOREST – FAQs on LED Lighting, Controls and Outdoor Use

Are VONDOM Christmas Trees Suitable for Outdoor Use?

Yes. FOREST and CHRISMY are designed for indoor and outdoor use. The material is UV-resistant and weatherproof. LED versions intended for outdoor use have an IP65 protection rating.

IP65 means the protected components are dust-tight and resistant to water jets, making them suitable for typical winter weather conditions.

All electrical connections and accessories must be installed and used according to their respective protection ratings.

Which LED Lighting Option Should You Choose?

When choosing an illuminated designer Christmas tree, the lighting option is a key consideration. The differences concern not only the available colours but also the control options.

White LED – Simple, Elegant Lighting in a Fixed White Tone
The White LED version emits a fixed neutral white light with a colour temperature of approximately 4,000 to 4,500 K.

As only one white tone is available, no remote control is needed or supplied.

Power is supplied through a cable with a plug. The lighting can be switched on and off using a suitable switched socket or timer.

Our recommendation: Choose White LED for elegant, consistent Christmas lighting without colour changes.

RGB LED – 3 White Tones, 9 Colours and Custom Lighting Effects
The RGB LED version offers considerably more flexibility.

Choose between warm white, neutral white and cool white, plus nine additional colours.

The included remote control allows you to:

Product information

- select individual fixed colours,
- activate automatic colour sequences,
- adjust the speed of colour transitions,
- control brightness.

This makes it easy to adapt the lighting to different surroundings, occasions and preferences.

If you own several illuminated VONDOM products, you can assign a different fixed colour to each one.

Our recommendation: Standard RGB LED is more than sufficient for most residential settings and many commercial installations.

WiFi and DMX – Synchronised Lighting for Multiple VONDOM Products

Advanced lighting control is particularly useful when several illuminated VONDOM products need to change colours automatically and in synchronisation.

Standard RGB LED also offers automatic colour sequences. However, when products are operated independently with their own remote controls, their colour transitions gradually fall out of sync.

Visible differences may appear after just a few minutes.

For example, if five CHRISMY Christmas trees or a combination of illuminated trees, planters and lounge furniture should display identical colour changes, a compatible central control system is recommended.

VONDOM Access Point HOME – Smartphone and Tablet Control

Compatible WiFi control requires the separately available VONDOM Access Point HOME.

It allows you to operate the lighting through a dedicated smartphone or tablet app.

Access Point HOME can control up to ten compatible products within an approximate range of 12 to 15 metres. Actual range depends on local conditions.

Multiple illuminated objects can therefore be controlled together with synchronised colour changes.

Control is provided through the app rather than the individual remote controls.

VONDOM Access Point PROFESSIONAL – Professional Lighting Integration

VONDOM Access Point PROFESSIONAL is designed for larger installations and integration with professional building automation systems.

It is particularly relevant when lighting needs to be operated through a central control console or integrated into a suitably planned KNX or bus-based system.

The technical integration must be coordinated with the existing building automation infrastructure.

Our recommendation: Choose advanced WiFi or DMX control only when you genuinely need these functions. For fixed lighting colours, standard RGB LED is usually the most practical choice.

Battery or Mains Power – Which Is Better?

The battery-powered version provides approximately 6 to 8 hours of operation and requires around 4 hours for a full recharge.

The battery is designed for approximately 500 charging cycles. A charger is included. The appropriately equipped battery version also features IP65 protection.

Product information

When Do We Recommend the Battery Version?

Battery power is especially useful where no suitable permanent electrical supply is available.

Typical applications include:

- events and temporary installations,
- receptions and presentations,
- short-term decorative displays,
- locations without a suitable power connection.

For Christmas lighting operated for many hours each day over several weeks, we generally recommend the mains-powered version.

Our advice: Do not choose battery power simply for its apparent flexibility. Where a suitable power supply is available, the wired version is usually more convenient for continuous use.

How Do You Clean and Maintain FOREST?

Cleaning is straightforward. For normal dirt, use a soft cloth, water and a mild detergent. More stubborn dirt can be removed from the robust plastic surfaces with a pressure washer. Avoid aggressive cleaners, abrasives and hard brushes.

about Vondom

Vondom stands for a modern lifestyle. Vondom indoor & outdoor furniture is designed with passion for people who appreciate innovation and quality - people like you who love trends and demand the best.

Focus on design
Design is the key to our success. With each new collection, we create spaces full of glamor and uniqueness. Vondom furniture brings life and elegance to every room, so you can enjoy life to the full.

Global designers
Vondom collections are created in collaboration with international designers such as Fabio Novembre, Karim Rashid and many more. Their passion for modern forms and culture makes every piece of furniture an exclusive work of art.

Sustainability & Innovation
Sustainability is a core value at Vondom. Vondom is continuously researching new technologies and materials to protect our environment. Vondom shares this knowledge in workshops, exhibitions and events worldwide.

Global success
Vondom is present in over 120 countries, with flagship stores and showrooms around the world, including Valencia, Miami, Los Angeles and Shanghai.
