Resistant to temperatures (-35°C to +80°C)

Product information

Impact and wear resistant. 100% reusable

Available accessories: 3 Aisi 316 stainless steel ground fixing plates as anti-theft protection

Minimum order quantity: 2 planters

Product description

The illuminated planter Bordato Liscio 58 from Serralunga 1825 is much more than just a normal planter! Rather, it is undoubtedly one of our classics in the product range and, in addition to its timeless beauty, also impresses with its variety and numerous applications. This great planter can certainly also be used to set a Christmas tree skillfully and illuminated in scene. Filled with ice cubes, it can be used as a beverage cooler or converted into a side table or bar table by placing a glass top on top. There are no limits to your imagination!

Serralunga Clean Fighter

SERRALUNGA presents CLEAN FIGHTER, a new innovative composite for fast and efficient cleaning.

As part of Serralunga's ongoing research and innovation activities, a new compound has been developed: Clean Fighter.

Clean Fighter is an innovative composite that allows fast and efficient cleaning of all Serralunga furniture, flower pots and furnishings in standard colors. Less time spent cleaning is the result. CLEAN FIGHTER is not needed for products in matt or glossy finish.

Clean Fighter is absolutely versatile. Particular feature is the ability of the material to adapt to different shapes.

about Serralunga

The first in Europe to develop rotational molding technology, the first to introduce the design jug and conceive the oversized jug. The first to design the illuminated jug, the first to exhibit an industrial vase in a museum and the first to develop new painting technologies with patterns.

Those who choose Serralunga can recognize and appreciate originality.

A FAMILY BUSINESS WITH HEART

THE HERITAGE

Serralunga was founded in Biella in 1825 and is the name of the family that has been the creative and entrepreneurial heart of the company for six generations, producing modern outdoor furniture.

The company was founded as a tannery and then moved to leather processing for industrial purposes. The real revolution came with the processing of plastic and then with the rotational molding technology imported from the United States, which has produced countless Italian design objects such as outdoor lighting and contemporary furniture, all made in Italy.

MADE IN ITALY

Serralunga continues the excellence that has long been associated with the "Made in Italy" label, while offering new ways of living that allow us to relax and unwind with furnishings that enrich our lives.

Product information

CULTURAL INNOVATION

Serralunga is known for pushing the boundaries of materials, technologies and aesthetics with its sense of innovation and craftsmanship to create groundbreaking products that both inspire and delight.

Serralunga 1825

The style, beauty and decorative design of the Serralunga production have a precise historical reference and can be traced back to a centuries-long Italian tradition in the field of artistic vessel design.

The first vessels were used as early as the Roman era to plant fruit trees. Later on, Later, during the imperial period, clay jugs, urns and goblets appeared, whose shapes were limited to the essentials and which were intended for storing ornamental plants.

During the Renaissance, the style of Tuscan terracotta vessels evolved into elaborately decorated bowls, square boxes, festooned vases, clay jugs and other forms that continued their artistic evolution during the Baroque period. Over time, Serralunga has maintained the traditional creative and artistic vitality of this noble Italian product, introducing the use of resinous materials. The history of the company begins in 1825, when Pietro Serralunga realized the first containers made of sewn parchment and produced the first articles made of leather pressed into moulds and dried. In 1860, his son Giovanni Battista expanded the company's production capabilities and turned it into an important industrial reality.

Elected deputy, he became a representative figure in the history of business and society in the Biellese region. The company's tradition of productive innovation continued into the XX century and in 1959 it was Gianpietro Serralunga who recognized the enormous potential of the latest plastic materials and added new technologies to the old machinery. In 1976, now in the fifth generation, his sons introduced rotational molding technology to the company, an injection system using the best quality polypropylene, which is also recyclable, and the innovative processing technique of gas molding, called Airtouch. Today, the company extends over 25,000 m², exports 70% of its production and employs 70 people, including a large number of specialized technicians, those responsible for the strategic areas of development and quality control and also collaborates with various designers.
