Product description

The master Eero Aarnio creates the Peacock Collection, his first piece for Vondom. It is undoubtedly a flower pot with a unique design, an amusing and symbolic element. As the creator describes it, peacocks were part of his childhood, even if their country of origin is far from Finland. Eero's home was very close to Helsinki Zoo, which is located on an island where peacocks imported from India could move freely, as their poor flying skills prevented them from flying away. Such memories are the inspiration for the creation of this new design planter with much symbolism for Eero, who naturally named it "Peacock", bringing about a reunion with this figure from his childhood. Vondom admires the iconic and timeless creations of Eero Aarnio.

VONDOM planters

Material properties:

- Material: LLDPE resin, linear low density polyethylene. UL 94 HB
- Manufacturing process: Rotational molding - rotational molding process
- UV-resistant, factor: UV8, corresponding to 8,000 hours of Florida sunshine
- Extremely temperature resistant (-60 to -80 degrees Celsius)
- Impact resistant
- Lightweight
- 100 % recyclable

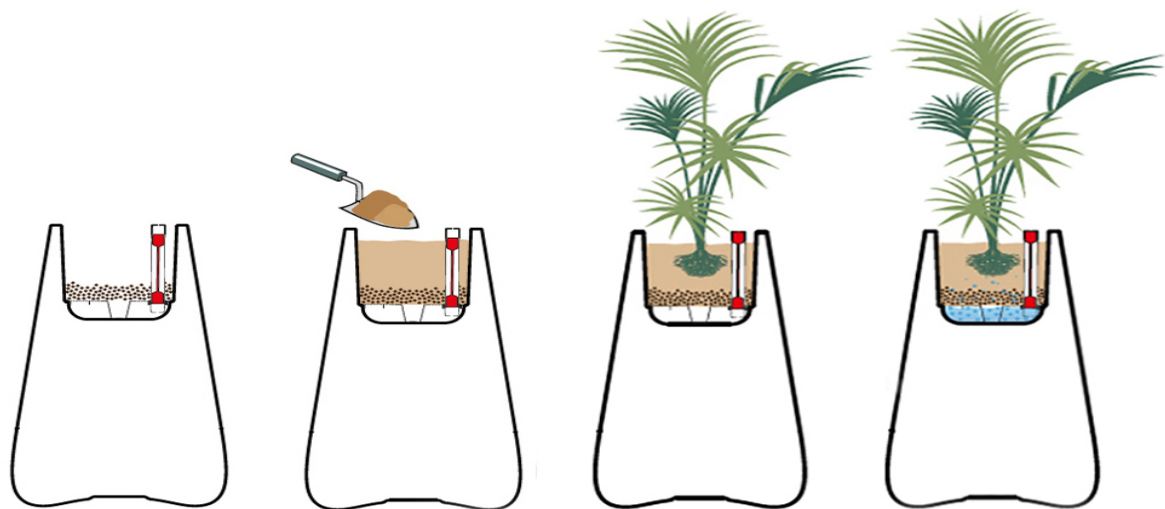

Watering system & integrated wheels:

Planters with a self-watering system are usually supplied with integrated wheels up to a size of 60cm. The integrated wheels make it easier to move the planter. The watering system ensures perfect care for your plants. The watering system is designed for indoor use only and is not suitable for outdoor use.

Indoor or outdoor use?

Illuminated planters have an integrated and lockable water drain. This means they can be used both indoors and outdoors. Planters without lighting do not have integrated water drainage. When used outdoors, several holes must be drilled with a drill both in the base of the planting area and in the subsoil on which the planter stands to prevent waterlogging.
