Product description

Marquis, designed by Estudi{H}ac for Vondom, is a planter collection born from the inspiration of diamond cutting. Its polygonal design is reminiscent of facets created by cutting. It also includes a design table lamp. The Marquis design combines geometric shapes with folding systems to create a restructured exterior of simple triangles. The clean and stylish shapes create a great visual impact. Round or oval and in two color combinations, they add great dynamism to a room. Marquis table lamp is characterized by the effect created by the light when it falls through these figures. It surprises with the play of shadows and light transmitted to the surfaces, showing a world of textures that brings us back to the pleated fabrics.

Watering system & integrated wheels:

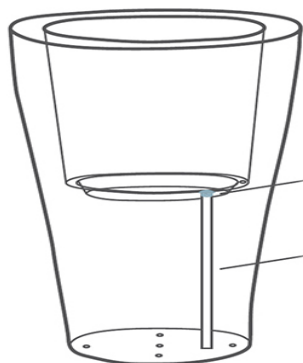

Planters with a self-watering system are usually supplied with integrated wheels up to a size of 60cm. The integrated wheels make it easier to move the planter. The watering system ensures perfect care for your plants. The watering system is designed for indoor use only and is not suitable for outdoor use.

Indoor or outdoor use?

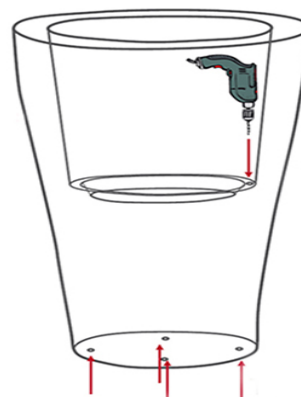

Illuminated planters have an integrated and lockable water drain. This means they can be used both indoors and outdoors. Planters without lighting do not have integrated water drainage. When used outdoors, several holes must be drilled with a drill both in the base of the planting area and in the subsoil on which the planter stands to prevent waterlogging.
