Structure: Cor-Ten steel, waxed

Application: Indoor use

Manufacture: This vase was made entirely by hand with no visible weld seams

De Castelli

Diversified in form and material, the collection of vases from "De Castelli" is often oversized. In its vases, "De Castelli" combines manufacturing technologies and pure craftsmanship. Materials such as Cor-Ten steel, bronzed iron, satin-finished or polished Aisi 304 stainless steel and surface finishes such as silver leaf and gold leaf plating or lacquering in all RAL colors guarantee unique products in harmony with the craftsmanship. Each vase is unique and, depending on the material used, is suitable for both indoor and outdoor use.

Material / Care

Cor-Ten steel:

For indoor use, the weather-resistant steel is treated with stabilizing wax. For outdoor use, Cor-Ten steel is used without further treatment. The oxidation of the stabilization phase takes 10 to 16 months
