Delivery time: 4 - 6 weeks

Product information

Dimensions / Technical Data:

Dimensions approx: 340cm long, working height 88cm, counter height 110cm high total depth 90cm.

Structure: Polyethylene "POLEASY", patented, weather resistant, unbreakable and without micropores

Color of the structure optional:
Colored matt dyed through
Translucent = translucent

Available colors optional: See color palette

Included in delivery:
2 x corner element 90x90x110cm
1 x element straight 160x110cm
3 x worktops for the work surface (1 x straight element, 2 x corner element)
4 x side panels

Available accessories:
2 x shelves for straight element (not to be used with Cocktail-Station)
Cocktail station (for straight bar element) made of ABS white, antibacterial, glossy methacrylate, reinforced. Complete with mixer, drain and speed rack.

Special feature:
Very suitable for professional use.
UVI resistant.
Resistant to temperatures (-60ºC to +80 ºC).
Shock and wear resistant. 100% reusable
Excellent mechanical properties

Design: Moredesign

Product description

A revolutionary bar for outdoor use, which at any time can also become a sophisticated and functional fixed counter for indoor use. The modular structure guarantees that the bar is suitable for any use.
A successful and elegant design for any individual solution. The foldable structure reduces the volume to a minimum during transport and storage. The bar Baraonda of Myyour is a real innovation and can not be classified in any fixed category, through Baraonda completely new possibilities are created: A true expression of the "Italian different concept".

Two types of modules are offered (curved, 1x1m and straight, 1.60m); modular sides with 2 different depths, with the possibility of installing equipment for accessory shelves and the installation of a raised platform, for an ideal working height inside. The work surfaces in waterproof laminate are available in three depths (300mm, 600mm and 900mm),. Optionally available are: a cocktail station in injected and reinforced ABS, a professional and ergonomic workstation for the needs of the experienced bartender; cutouts

Product information

for quick installation of electrical and water supply adjustable feet, casters, drill holes for quick connection of different bar elements; and as an exclusive extra, a LED lighting system at the cutting edge of technology: RGB technology with the possibility of setting numerous lighting effects and color variations. The lighting control system can be adjusted to existing lighting control systems with more complex lights, such as those used in bars and discotheques. Baronda is a bar and counter system suitable for any situation, so flexible that in its basic configuration it can also be used as a reception counter. By using the Myyour patented material Poleasy with the almost unbelievable properties in terms of lightfastness and cleaning which is used only by Myyour, Baronda puts everything else in the shade.

MyYour - Material & Care

POLEASY:
Design and technology are not the only factors that make the difference in Myyour products: also because, as far as the materials are concerned, this company, which is based in Padua, Italy, is able to fully express itself thanks to a new and special type of polyethylene called Poleasy. Poleasy was developed after long years of research. In fact our research was focused on finding a way to eliminate the microporous surfaces that are responsible for the formation of anti-aesthetic patinas or cracks over time. Poleasy, an exclusively international patent, has entirely solved this problem by ensuring compactness to the surfaces of Myyour’s creations and a better performance in terms of durability, washability and color brightness.

ROTATIONAL:
At Myyour, the rotational molding of polyethylene goes beyond the purely technical aspect. It becomes a process that is strongly connected to the best traditions of craftsmanship. It is here that man, hands and time encounter the ancient gestures and rhythms that enable them to act intelligently and in synergy with machines as to attain perfection. The skillful blend of powders, the rotation of the molds, which rotate for almost an hour to favor the creation of an appropriate thickness, the hot extraction process of the manufactured item and its dimensional stabilization, which is obtained through custom made templates, are all very slow and delicate phases of the process. These phases are scrupulously and skillfully managed to prevent errors from cropping up. The product is finished manually before finally being blazed to create a smooth and shiny creation.

COATING:
This goal seemed almost impossible to attain a few years ago. Today, coating polyethylene has become a wonderful reality: dense and compact, smooth and almost metallic-like... it embellishes and greatly impacts Myyour products. This was made possible thanks to the scientific research, tests and experiments that brought to light the right formula. We have now obtained a primer that of plastic and to ensure a durable application on smooth surfaces and without ever having to drill a hole. After applying this unique background layer, each piece is carefully sanded by hand: three careful coatings are sprayed on the product and a trip to the oven does the rest. All of this contributes to the much desired and beautiful colors of Myyour, which are weather resistant and able to remain intact over a long, long period of time.

About My Your

MY YOUR is a story, a family and an Italian design company.
MY YOUR has evolved over time, changing and improving its design and introducing technological innovations hand in hand with its brand identity. Today MY YOUR presents its new and consolidated identity as a publisher and manufacturer of furniture and accessories that help create spaces with a strong personality, without ever neglecting the elegance of form and qualitative excellence. MY YOUR is designed and produced entirely in Italy, both as a brand and as the aesthetic and functional language of the outdoor collections.
