## Product description

---

CHEMISTUBES is based on "decontextualization". A new object is made by increasing the size (scale intervention), using different materials than the original (in this case the ecological material polyethylene resin using the technique of rotational molding) and changing the original purpose. The object was first designed. What was once a laboratory container is now a designer planter, a decorative IN&OUT item. In addition to versions in a wide range of matte or lacquered colors, Vondom also offers you the option of additional lighting, which gives this collection a more interesting touch and creates a surprising, harmonious environment with great elegance for any indoor or outdoor space.

### Material properties:

- Material: LLDPE resin, linear low density polyethylene. UL 94 HB
- Manufacturing process: Rotational molding - rotational molding process
- UV-resistant, factor: UV8, corresponding to 8,000 hours of Florida sunshine
- Extremely temperature resistant (-60 to -80 degrees Celsius)
- Impact resistant
- Lightweight
- 100 % recyclable

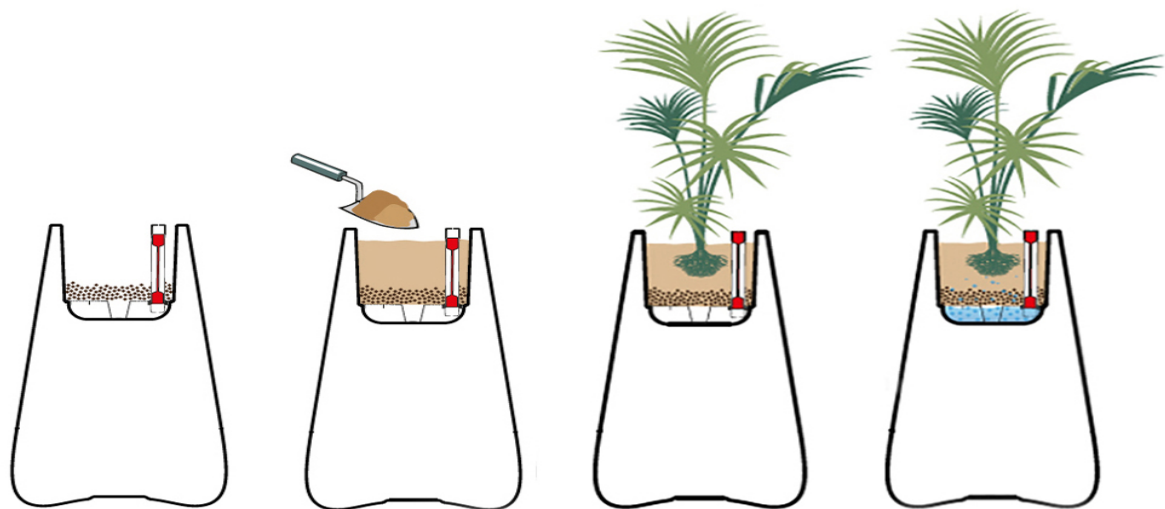

### Watering system & integrated wheels:

Planters with a self-watering system are usually supplied with integrated wheels up to a size of 60cm. The integrated wheels make it easier to move the planter. The watering system ensures perfect care for your plants. The watering system is designed for indoor use only and is not suitable for outdoor use.

### Indoor or outdoor use?

Illuminated planters have an integrated and lockable water drain. This means they can be used both indoors and outdoors. Planters without lighting do not have integrated water drainage. When used outdoors, several holes must be drilled with a drill both in the base of the planting area and in the subsoil on which the planter stands to prevent waterlogging.
