MAWA DESIGN Contact track Spotlight SEVENTIES se-11

Art.Nr.: MAW99 / GTIN: 4059735069086 / manufacturer: [Mawa Design](#)

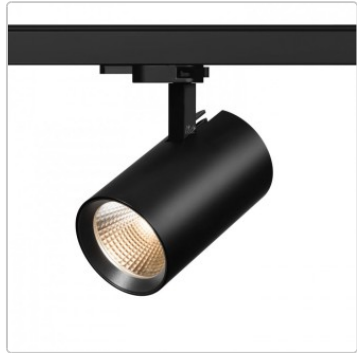

468,00 €

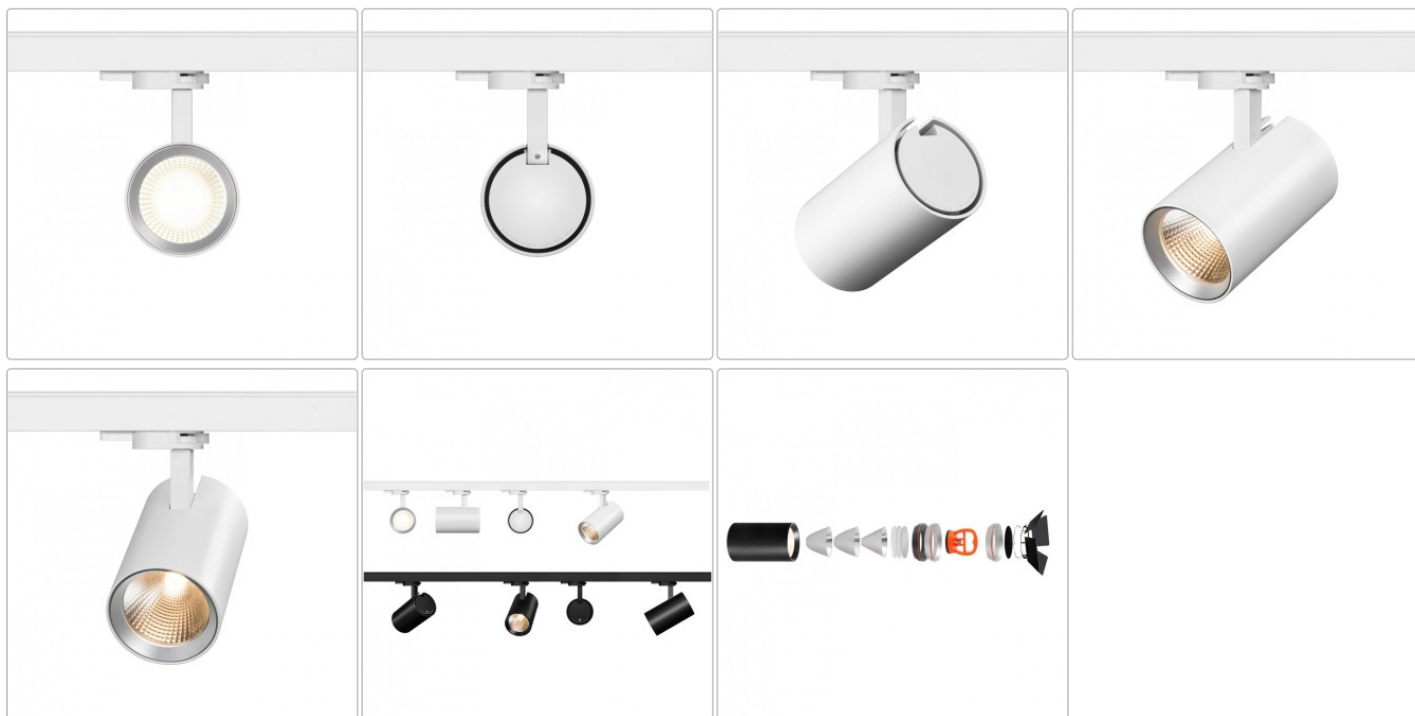

Regular retail price 520,00-€ (you save 52,00 €)

incl. 19% VAT incl. Shipping

 Delivery time: 4 - 6 weeks

Product information

Dimensions / Technical Data:

Dimensions approx: Ø 9cm, length 18.5cm

Light source: LED 2600 lm, 25 watts, LED service life > 55000 hours

Light color (Kelvin) optional:

2700 warm white

3000 bright warm white

4000 neutral white

Beam angle optional:

11° = spot

13° = spot

20° = medium

30° = flood

40° = flood

52° = flood

Product information

Color rendering index: Ra > 95 (typ. 97)

Control optional:

Casambi Bluetooth dimmable. Light control via app (3-core power cable)

1-10 volt dimmable via rotary potentiometer on the housing, 4- or 5-core power cable (control cable) required

DALI dimmable (housing 30mm longer) 4- or 5-core power cable (control cable) required

Adapter for track: MAWA will switch from Eutrac adapters to Powergear adapters from 01.01.2023. The products are suitable for use in the PRO-06 and PRO-R6 Powergear 3-phase power rails. Eutrac adapters available on request for an additional charge, subject to availability

Special feature:

DEKRA tested

Equipped with EUTRAC adapter for 3-phase track as standard

Spotlight can be rotated 350° and tilted 90

HDTV-compatible

Flicker-free

Very good efficiency (lm LED)

Available accessories:

Clear borosilicate glass - is used for optimum image lighting and to create spotlights

Sculpture lens (oval light distribution)

Glare flap (especially for use in museums and galleries)

Honeycomb louvre (for lateral glare control of the spotlight)

Reflectors (high-performance reflectors with 16° - 22° - and 30°)

Shutter (to reduce stray light & reflections) in 30mm or 90mm length (outer color like spotlight)

Suction lifter: For changing the lens without tools (if the lens needs to be changed to a different beam angle at a later date)

Product description

High CRI Ra > 95 (typ. 97) is the new standard

70's - smallest construction volume, without visible screw connection, 365° rotatable and 90° tiltable, integrated transformer technology, 3000 lm, 25 watts, CRI > 90, equipped with EUTRAC UniCompact adapter for 3-phase track as standard. New! Available with fully integrated Eutrac-in-trac adapter. ATTENTION: Eutrac-in-trac adapter pre-assembled with track spotlight. Adapter not available separately.

Mawa sets new standards with this volume light output. The heat sink is friction-locked to the housing, increasing the cooling surface and ensuring an optimum mass/surface cooling ratio.

Three high-performance reflectors 16°, 22° and 30° with an efficiency of 90% are available. Thanks to protected Mawa technology, these can be changed using a glass suction cup. The Seventies is fitted with a 30° reflector as standard; alternative beam angles can be found under Components / Accessories.

The retaining ring is supplied as standard in black for RAL 9005 black dull matt and in silver for RAL 9016 white matt. The spring washer is supplied in anodized black as standard.

Product information

About Mawa Design

Mawa Design was founded in 1977 by Martin Wallroth. In the company, which was then located in Kreuzberg, he developed and produced objects for the living area. In the following years, the one-man business expanded and established itself as a professional company. During this time, Mawa Design designs often took a pioneering role for formative ideas in the field of product design. To this day, the unusual combination of design office and manufactory contributes significantly to the company's success.

The eighties made understanding and interest in design popular. Mawa Design therefore broke new ground. In cooperation with external designers, product ideas for everyday life could be designed and quickly implemented due to the flexible structure of the company. The product range finds its customers mainly in the upscale retail trade.

In addition to the standard program of the manufactory, special productions according to individual specifications can of course also be realized. For example, luminaires have been produced for the Federal Chancellery, the Ministry of Economics, the Corbusier House, the Maxim Gorki Theater in Berlin or for the Luther House in Wittenberg. Renowned companies such as BMW, Daimler Benz, Jil Sander, Hotel Bleibtreu, KaDeWe, Sony or The Conran Shop work with Mawa Design when it comes to first-class lighting. Mawa products, which are characterized by high-quality materials and excellent workmanship, have been included in important collections of museums around the world.

Green light for further growth. With its own design department, research and development, as well as its own lighting laboratory, the company is now one of the preferred partners of internationally active specialist planners. mawa design has advanced from being an insider tip to a leading brand in the contract sector, especially in museums, libraries, sacred buildings and monuments with minimalist lighting tools. A new branding with a striking logo reflects the far-reaching importance of the company in the professional world. Here, too, the following applies to the design: less is more. And so in 2017, the brand name is also reduced to two syllables - mawa design becomes mawa. Only color and attitude remained unchanged green.
