■ Delivery time: 4 - 6 weeks

Product information

Dimensions / Technical Data:

Approx. dimensions: diameter 41cm, height 35cm

Light source: LED-RGB 3,8 Watt with battery, charger and remote control

Operating time: 6-8 hours, charging time 4-5 hours

Structure: metal, white powder coated

Diffuser:

Polyethylene POLEASY translucent, weather resistant and unbreakable

Free of micropores and therefore absolutely easy to clean (worldwide patented, novel polyethylene POLEASY)

Use: Suitable for indoor or outdoor use

Protection class: IP66 (outdoor use)

Special feature:

Charging by induction without electrical contact between charging station and battery.

Remote control allows to address several lights at the same time

Temperature resistant from -60°C to +80°C

100% recyclable

UVA + UVB resistant

Design: Moredesign

Minimum order quantity: 2 lights

Product information

Product description

Baby Love Waterproof is practical, handy, atmospheric and is in its element in water, but also in any other outdoor installation thanks to the IP66 rating and the base in satin 316 stainless steel that prevents it from tipping over. The minimum battery life is 6-8 hours and it can be recharged by induction, that is, without electrical contact between the charging base and the battery for maximum safety and ease of use.

The remote control allows remote control even of multiple lamps simultaneously. Baby Love Giardino, on the other hand, is firmly anchored to the ground by a pointed stake, it also provides a connection to the mains; ideal for decorating the garden in an atmospheric way.

MyYour - Material & Care

POLEASY:

Design and technology are not the only factors that make the difference in Myyour products: also because, as far as the materials are concerned, this company, which is based in Padua, Italy, is able to fully express itself thanks to a new and special type of polyethylene called Poleasy. Poleasy was developed after long years of research. In fact our research was focused on finding a way to eliminate the microporous surfaces that are responsible for the formation of anti-aesthetic patinas or cracks over time. Poleasy, an exclusively international patent, has entirely solved this problem by ensuring compactness to the surfaces of Myyour's creations and a better performance in terms of durability, washability and color brightness.

ROTATIONAL:

At Myyour, the rotational molding of polyethylene goes beyond the purely technical aspect. It becomes a process that is strongly connected to the best traditions of craftsmanship. It is here that man, hands and time encounter the ancient gestures and rhythms that enable them to act intelligently and in synergy with machines as to attain perfection. The skillful blend of powders, the rotation of the molds, which rotate for almost an hour to favor the creation of an appropriate thickness, the hot extraction process of the manufactured item and its dimensional stabilization, which is obtained through custom made templates, are all very slow and delicate phases of the process. These phases are scrupulously and skillfully managed to prevent errors from cropping up. The product is finished manually before finally being blazed to create a smooth and shiny creation.

COATING:

This goal seemed almost impossible to attain a few years ago. Today, coating polyethylene has become a wonderful reality: dense and compact, smooth and almost metallic-like... it embellishes and greatly impacts Myyour products. This was made possible thanks to the scientific research, tests and experiments that brought to light the right formula. We have now obtained a primer that of plastic and to ensure a durable application on smooth surfaces and without ever having to drill a hole. After applying this unique background layer, each piece is carefully sanded by hand: three careful coatings are sprayed on the product and a trip to the oven does the rest. All of this contributes to the much desired and beautiful colors of Myyour, which are weather resistant and able to remain intact over a long, long period of time.

About My Your

MY YOUR is a story, a family and an Italian design company.

MY YOUR has evolved over time, changing and improving its design and introducing technological innovations hand in hand with its brand identity. Today MY YOUR presents its new and consolidated identity as a publisher and manufacturer of furniture and accessories that help create spaces with a strong personality, without ever neglecting the elegance of form and qualitative excellence.

Product information

MY YOUR is designed and produced entirely in Italy, both as a brand and as the aesthetic and functional language of the outdoor collections.
