Product description

Designer Mathias Hahn named the E8 table after the place where he lived in London. In his kitchen there was the model for it: a provisionally assembled table from the post-war period - narrow, long and with overhangs. The format convinced him so much that he reinterpreted it for his own design. Thanks to its long surface, E8 can be used as a kitchen table and a work table at the same time.

An elaborate color staining technique creates a semi-transparent look and leaves the natural structure and depth of the oak wood visible. The surface treatment requires manual dexterity and can therefore not be automated. A special staining technique is applied in several work steps. Since the microstructure of the surface is not smooth but brushed, the stained wood appears naturally matt despite its coloration.

The color glaze for the colors zinc yellow and poppy differs significantly in appearance and technique from the color stain. It remains on the surface, so it does not penetrate into the wood. It differs from an opaque color varnish in that it leaves the wood structure visible.

About Zeitraum

Home:

ZEITRAUM is at home in the Bavarian foothills of the Alps. It is not so much the local roots that connect ZEITRAUM with our homeland, but rather the knowledge that life in the alpine region has traditionally been characterized by the conscious use of limited resources. The direct dependence on nature shapes ZEITRAUM's sense of responsibility and long-term thinking. The roots of the values lie in the respectful treatment of the natural habitat, which should be preserved for future generations in its diversity as a basis for life and a source of inspiration.

Longevity:

ZEITRAUM's designs are a tribute to the pure, the purity of the material and the durability of the form. Out of conviction, ZEITRAUM is committed to sustainable action in its entirety, and is committed to the principle that products are repairable, because this is the only way to ensure their longevity over generations. Repairing and maintaining deepens the relationship between man and product. ZEITRAUM has been pursuing the idea of combining design and ecology since its founding in 1990. ZEITRAUM processes only hardwoods from sustainable forestry and does not use any chemical treatment of the wood. The surfaces, left open-pored with biological oils, allow the furniture to breathe and retain its naturalness.
