Color optional:

RAL 9016, white fine structure powder-coated

DB 702 gray metallic powder-coated

dark bronze

Design: Mawa Design

Product description

CEILING Floodlight op 9

The wall-mounted ceiling washer provides powerful ceiling illumination that reaches deep into the room in a glare-free manner.

The simple, cubic housing is the result of our patented folding technology. Powerful LED modules, special reflector technology and the printed glass cover create a high-quality lighting result with a particularly soft gradient.

The model is available in four different power classes. Additional downlight components can be added on request.

A 2-part mounting set facilitates installation. In the case of soft or uneven wall surfaces, a sheet metal support creates a solid base.

The angle half-finished product placed on it serves to hold the luminaire housing and enables exact, horizontal alignment.

About Mawa Design

Mawa Design was founded in 1977 by Martin Wallroth. In the company, which was then located in Kreuzberg, he developed and produced objects for the living area. In the following years, the one-man business expanded and established itself as a professional company. During this time, Mawa Design designs often took a pioneering role for formative ideas in the field of product design. To this day, the unusual combination of design office and manufactory contributes significantly to the company's success.

The eighties made understanding and interest in design popular. Mawa Design therefore broke new ground. In cooperation with external designers, product ideas for everyday life could be designed and quickly implemented due to the flexible structure of the company. The product range finds its customers mainly in the upscale retail trade.

Product information

In addition to the standard program of the manufactory, special productions according to individual specifications can of course also be realized. For example, luminaires have been produced for the Federal Chancellery, the Ministry of Economics, the Corbusier House, the Maxim Gorki Theater in Berlin or for the Luther House in Wittenberg. Renowned companies such as BMW, Daimler Benz, Jil Sander, Hotel Bleibtreu, KaDeWe, Sony or The Conran Shop work with Mawa Design when it comes to first-class lighting. Mawa products, which are characterized by high-quality materials and excellent workmanship, have been included in important collections of museums around the world.

Green light for further growth. With its own design department, research and development, as well as its own lighting laboratory, the company is now one of the preferred partners of internationally active specialist planners. mawa design has advanced from being an insider tip to a leading brand in the contract sector, especially in museums, libraries, sacred buildings and monuments with minimalist lighting tools. A new branding with a striking logo reflects the far-reaching importance of the company in the professional world. Here, too, the following applies to the design: less is more. And so in 2017, the brand name is also reduced to two syllables - mawa design becomes mawa. Only color and attitude remained unchanged green.
