In our online store, we offer a selection of covers that are characterized by their ease of care and suitability for outdoor use. These covers are chosen 90% of the time because they offer an ideal combination of functionality, feel and comfort. You can easily make your selection using the “Vondom cover” feature.

Of course, we can offer you all covers from the Vondom collection on request. These covers, which are not available in our online store, are particularly suitable for use in regions with a predominantly sunny and dry climate or for indoor use. They impress with their particularly luxurious feel, but usually require more maintenance if soiled.

Product description

Ulm furniture collection designed by Ramón Esteve for Vondom is conceived as a new standard with a universal and logical appeal. A functional seating collection that creates a perfect balance between design, technology and ergonomics based on the basic shapes of cube, prism and sphere. The Ulm collection seeks unity in its design and that of other products, combining various elements into a complete ensemble. The sofa, as well as the chairs, the daybed, the coffee table and the ottoman, has rigid and elastic structures for rest and support, providing absolute comfort. The furniture collection also includes the Ulm lamp, the modular sofa and the other daybed versions. Much like the Ulm name, its soft shapes pay homage to the formal approach of the Ulm School. The possibility of lighting each piece can wrap any room in color and offers innovative technology that makes it unique.

about Vondom

Watering system & integrated wheels:

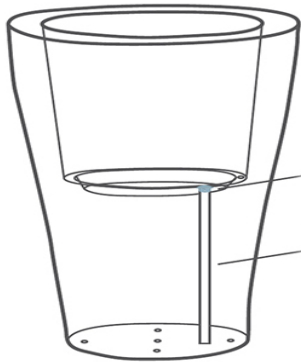

Planters with a self-watering system are usually supplied with integrated wheels up to a size of 60cm. The integrated wheels make it easier to move the planter. The watering system ensures perfect care for your plants. The watering system is designed for indoor use only and is not suitable for outdoor use.

Indoor or outdoor use?

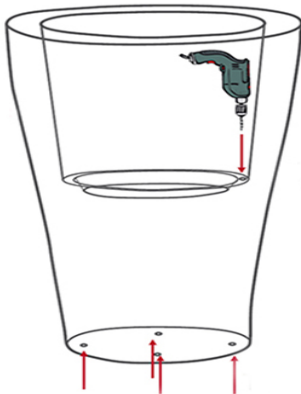

Illuminated planters have an integrated and lockable water drain. This means they can be used both indoors and outdoors. Planters without lighting do not have integrated water drainage. When used outdoors, several holes must be drilled with a drill both in the base of the planting area and in the subsoil on which the planter stands to prevent waterlogging.
