Design: Stefano Bettio 2020

Product description

Practicality is at the forefront of the mini version of Giralot Office. Two solid and rotating containers, complemented by a pull-out work surface, furnish the space of the home dedicated to the office in a spirit of order and rationalization. To transform even the smallest one-room apartments into creative workshops. Giralot is a mobile, variable functional piece of furniture with a column on the left or right, which is placed on the floor and fixed to the wall at 2 points and serves as an axis for the containers, which can be swiveled through 180°. The depth is 30 cm. The containers are available in V veneer (wood) and in all matt lacquer T Touch (colored lacquer) and the intermediate shelf can support a weight of up to 15 kg. The furniture is supplied fully assembled. In the standard version, the maximum possible height of the skirting board is 7.5 cm; a 10 cm extension piece is also available, allowing a maximum skirting board height of 17.5 cm to be bridged. The new total height of the Giralot is then 206 cm. The heights of the individual swivel containers remain unchanged.

about Sculptures Jeux

Sculptures Jeux is about playing with spaces, making the home lively and changeable, it's about being original by bringing color into our lives.
Home is the refuge of our feelings, a place where we experience emotions with the people we love.
Thus, the space that surrounds us gains importance, the furniture follows our personality, it is one with what we want to convey every day, it means communicating without saying a word, but with materials, shapes and colors. People and their creativity are at the center of the room.

Product information

Sculptures Jeux is committed to the green concept and uses a photovoltaic system to support 70% of its production. All panel and solid material suppliers are FSC-certified. The combustion of the biomass generated from the operation heats Sculptures Jeux's offices and workplaces and the production follows US regulations for low formaldehyde emissions.
