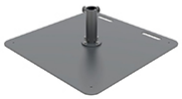
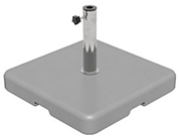
Stainless steel ground socket 50 cm long for setting in concrete. The upper part of the ground socket can be removed. For paved floors or mixed floors with soil, sand or cavities.



OSLO base plate:
Powder-coated, 70x70x1 cm, steel plate with screw-on stand for screwing to the foundation. Weight 42 kg:

Base plate GENF:
Powder-coated, 100x100x1 cm, steel plate with screw-on stand for screwing to the foundation. Weight 85 kg:

Product information



Paris:
Concrete stand with recessed grip, stainless steel tube. 59x59x12 cm, 85 kg.

Rome:
Granite stand, polished, stainless steel tube. Ø 70 cm, 90 kg.

Available fabric colors

Premium Acrylic Awning Fabric:

The high-quality acrylic awning fabric is made of 100% solution-dyed branded acrylic. Unlike conventional yarn dyeing, the color pigments are incorporated directly during the fiber production process. This ensures highly reliable protection against harmful UV radiation while maintaining long-lasting, vibrant, and lightfast colors.

The robust acrylic fabric also impresses with its high tear resistance. A special protective finish makes the material water- and dirt-repellent. This provides a durable and proven solution for long-term outdoor use.

Fabric Specifications

− Waterproof 300 – 460 mm water column, EN 20811
− High color and weather fastness (7 – 8 of 8)
− Water- and dirt-repellent
− 100% acrylic 285 – 300 g/m²
− Custom branding on canopy and valance possible

Many fabrics are also available in All Weather quality. Waterproof up to 1000 mm water column, EN 20811.

Premium Acrylic ProNature:

With Acryl ProNature, CARAVITA presents an innovative fabric option with added value: a special finishing treatment actively contributes to improving air quality. Through a photocatalytic process, pollutants such as nitrogen oxides, sulfur oxides, and organic compounds are reduced – while unpleasant odors are neutralized at the same time.

Product information

This creates a noticeable contribution to greater sustainable quality of life outdoors. In terms of durability, weather resistance, and technical performance, Acryl ProNature fully matches the proven classic acrylic fabric.

– Waterproof 300 – 370 mm water column, EN 20811
– High color and weather fastness (7 – 8 of 8)
– Water- and dirt-repellent
– 100% acrylic 285 – 300 g/m²
– Custom branding on canopy and valance possible

Tempoteststar FR:

The Tempoteststar fabric collection by PÀRA consists of a flame-retardant textile certified according to the recognized fire protection class B1. The high-quality, 100% solution-dyed polyester is available in a wide range of colors and is particularly suitable for applications where fire safety requirements play a central role.

– Flame-retardant, fire protection class B1 (DIN 4102)
– Oil-, water-, and dirt-repellent
– High color and weather fastness (7 – 8 of 8, DIN EN ISO 105 B04)
– Waterproof 280 – 300 mm water column, UNI EN 20811
– 100% solution-dyed polyester 300 g/m²

Ferrari Precontraint 302

This PVC-coated sun protection membrane is characterized by exceptional durability and strength. It is completely waterproof and meets high flame-retardancy standards – properties that prove particularly valuable in demanding outdoor environments.

– Not suitable for Big Ben Freestyle, Belvedere, Grande
– Flame-retardant, fire protection class B1 (DIN 4102)
– Polyester fabric with PVC coating
– Completely waterproof
– Dirt-repellent
– High color fastness (7 – 8 of 8, DIN EN ISO 105-B02)
– Surface weight 480 g/m²
– Custom branding on canopy and valance possible

Options & Accessories

Wind roof and wind vent:

Wind vent: The sewn-in vent lies on the canopy, lifts in the wind and reduces wind load.

Wind roof: Features an additional frame. Enhances the appearance and improves wind resistance. Heat can escape upwards, preventing heat build-up.

Valance types:

Product information

Flowing valance: Seamless transition from canopy to valance without a visible edge. Moves in the wind.

Attached valance: Visible edge between canopy and valance. Side sections are connected, reducing movement – ideal for advertising umbrellas.

Protective cover in PVC (light grey)

Protective cover in acrylic (light grey or matching canopy color)

Cover rod: Telescopic rod for easy handling when placing the cover.

Mast protection padding: Height 90 cm, padding thickness 4 cm, fastening with Velcro.

Base protection padding

Accessories such as heaters, integrated lighting and motor drives are available for BIG BEN series umbrellas.

Product description

SAMARA

The comfortable crank umbrella!

The heart of Samara, a stainless steel screw jack, allows opening by crank with minimal effort. When closing, it extends the mast so that the umbrella closes above table height. As easy as child's play, the shade dispenser with its smooth-running crank mechanism unfolds its true size and warmly welcomes its guests. Samara doses hot sun rays during the day and ensures pleasant temperatures under the umbrella in the evening. Even in its largest version, the visually lightweight parasol is amazingly easy to operate.

Aluminium rings made of solid aluminum and double-layer struts made of reinforced aluminum ensure that Samara can withstand even high stresses despite spans of up to 5.5m round.

SAMARA
-Premium awning cloth. Other high-tech outdoor cloths available at extra cost.
-Robust aluminum frame with 50mm pole (3mm wall thickness) and 30x15x2mm struts.
-Struts 30x15mm with internal reinforcement!
-Frames in white RAL 9016, anthracite gray RAL 7016, aluminum matt anodized.
-frames in other RAL colors for an additional charge.
-Solid aluminum umbrella rim, powder-coated to match the color of the poles.
-Crank drive by spindle lifting gear with stainless steel spindle
-Removable stainless steel crank handle

About Caravita

CARAVITA is regarded as the leading brand for high-quality sunshades and sun sails and as a synonym for quality and design. With spans of up to seven meters, the noble large umbrellas create space for all conceivable uses and, thanks to an exceptionally robust construction, can withstand even high wind loads. Innovative mechanisms open each umbrella size as smoothly as on the first day,

Product information

even after years of use, and ensure easy and convenient handling. CARAVITA parasols are characterized by handcrafted, made-to-measure production. The complete selection of fabric and frame colors can be individually combined. This guarantees - in connection with many other brilliant extras - the fulfillment of highest demands in gastronomy, hotel business and in the private garden.

- Individual design: over 130 fabric and 200 frame colors according to the customer's wishes.
- Durable products: Due to high-quality aluminum and stainless steel components
- Innovative mechanics: Ensures smooth operation for years to come
- High stability: Thanks to above-average wall thickness of pole and struts
- Special shapes made to measure with the Big Ben Freestyle

The living space grows out into the open. Eating, drinking, celebrating, laughing or working outside - there are no limits to individuality. No matter whether on the private balcony or the cozy restaurant terrace. Even in spring, when the first warm rays of sunshine entice people outside, they want to enjoy additional comfort. Indispensable for leisure time in the green are well thought-out trend products in the field of sun protection. This is the only way to create new favorite spots and make outdoor living a year-round pleasure.

- Off-the-peg sunshades? Not at CARAVITA. After all, your requirements and needs are also quite individual. That's why each of our sunshades is custom-made. See for yourself how, with over 30 years of experience and a lot of passion, a high-quality shade provider is created.
