Product information

Dimensions / Technical data:

Approx. dimensions: lampshade Ø 30cm, total height incl. suspension and canopy 90cm (can be shortened)

Socket / module: Including LED, 12.7 Watt L90(10k) > 61,000h (IES LM-80 / TM-21)

Beam angle: 38°

Light colors / luminous flux optional:
2700 Kelvin warm white - 1100 lumen
3000 Kelvin bright warm white - 1200 lumen
4000 Kelvin neutral white - 1350 lumens

Lampshade(mouth-blown glass body) optional:
clear
opaque white matt

Canopy and monk's cap optional:
matt white (RAL 9016)
metallic gray (DB 702)
black matt (RAL 9005)

Suspension: Transparent cable with integrated suspension cable 2.50 m

Design: Daniel Frey & Martin Wallroth

Product description

Product information

The hand-blown, white frosted glass body of the "glaskugelleuchte" is available in 3 different diameters: 200, 300 and 400 mm and is held by a powder-coated monk's cap. The luminaire is suspended via a transparent cable with an integrated safety cable.

The "glaskugelleuchte led" in a clear, satin or metallized version is the logical continuation of the classic spherical luminaire. Simple form meets precise, state-of-the-art LED technology. Suitable for use in the home as well as in the contract sector.

Each luminaire is unique - a note on glass quality
The glass for MAWA glass globe lights is manufactured by hand in a very elaborate triplex process and consists of three layers of glass. Therefore, slight deviations in dimensions, glass thickness or occasional air bubbles are unavoidable (2.5-3 bubbles with a diameter of up to 5 mm per 50 mm2 are within tolerance). Deviations in diameter and shape may also occur at openings. These deviations are a sign of quality craftsmanship and do not constitute grounds for complaint.

About Mawa Design

Mawa Design was founded in 1977 by Martin Wallroth. In the company, which was then located in Kreuzberg, he developed and produced objects for the living area. In the following years, the one-man business expanded and established itself as a professional company. During this time, Mawa Design designs often took a pioneering role for formative ideas in the field of product design. To this day, the unusual combination of design office and manufactory contributes significantly to the company's success.

The eighties made understanding and interest in design popular. Mawa Design therefore broke new ground. In cooperation with external designers, product ideas for everyday life could be designed and quickly implemented due to the flexible structure of the company. The product range finds its customers mainly in the upscale retail trade.

In addition to the standard program of the manufactory, special productions according to individual specifications can of course also be realized. For example, luminaires have been produced for the Federal Chancellery, the Ministry of Economics, the Corbusier House, the Maxim Gorki Theater in Berlin or for the Luther House in Wittenberg. Renowned companies such as BMW, Daimler Benz, Jil Sander, Hotel Bleibtreu, KaDeWe, Sony or The Conran Shop work with Mawa Design when it comes to first-class lighting. Mawa products, which are characterized by high-quality materials and excellent workmanship, have been included in important collections of museums around the world.

Green light for further growth. With its own design department, research and development, as well as its own lighting laboratory, the company is now one of the preferred partners of internationally active specialist planners. mawa design has advanced from being an insider tip to a leading brand in the contract sector, especially in museums, libraries, sacred buildings and monuments with minimalist lighting tools. A new branding with a striking logo reflects the far-reaching importance of the company in the professional world. Here, too, the following applies to the design: less is more. And so in 2017, the brand name is also reduced to two syllables - mawa design becomes mawa. Only color and attitude remained unchanged green.
