## Product information

# TUUCI BAY MASTER Classic parasol Ø 2,25 meters

Art.Nr.: TUU16 / manufacturer: Tuuci

**1.597,50 €**

Regular retail price ~~1.775,00 €~~ (you save 177,50 €)

incl. 19% VAT incl. Shipping

Delivery time: 10 - 13 weeks

# Product information

**Dimensions / Technical data:**

Approx. dimensions: Ø 2.15 meters hexagonal

Frame: matt anodized aluminium. Other versions at an extra charge, see selection

Mast: Ø 38mm

Opening system: pulley system with sail clamp

Cover: TUUCI class "B", acrylic awning fabric, manufactured by Sunbrella®, mildew, dirt & water resistant

Fabric color: See color palette (other fabric colors on request)

Required sunshade stand weight: Minimum 34 KG

Included in delivery: Wind cover

Available accessories:
Round umbrella stand with aluminum shell and concrete filling including castors, 43 KG, (Ø 61cm) including sleeve
Galvanized round steel plate, 34 KG, (Ø 61cm) including sleeve
Galvanized square steel plate 41 KG, (61x61cm) including sleeve
Stainless steel ground sleeve for screwing on incl. concrete anchor & screws
Protective cover made of polyester, dark gray

Special feature: 5-year manufacturer's guarantee on the structure and 15 years on the fabric if the Tuuci care instructions are followed

**Product description**

The Bay Master series of umbrellas with marine-grade aluminum struts is our most durable promotional umbrella collection. Intended for most commercial settings, this umbrella features an extremely durable and rigid aluminum strut system. Proven in high traffic

# Product information

areas, ocean-front installations and exposed street-side locations, the Bay Master Classic with Aluminum Struts is guaranteed to endure all types of weather conditions.

**Tuuci Care Instructions**

TUUCI frames are made from durable, weather-resistant materials that are also used in boat building, including fiberglass, Armor-Wall aluminum, Dura-TEAK composites, Aluma-TEAK aluminum, and hardwood from sustainable sources. All connectors (nuts, bolts, wheels, clamps, etc.) are made from marine-grade stainless steel with the highest corrosion resistance. Proper maintenance and care are important to extend the lifespan of all TUUCI products. Clean your TUUCI shading equipment weekly with fresh water to maintain its appearance and prolong its lifespan.

Before opening, ensure the shading structure is securely mounted in the appropriate stand using the locking system designated for the specific product (star grip, safety pin, or locking lever).

To open a TUUCI umbrella, extend each rib 15cm away from the umbrella mast before fully opening the umbrella. If the umbrella resists when opening, do not force it. When closing, pull the fabric out from between the ribs to avoid pinching or damaging the TUFF-SKIN fabric.

Although many TUUCI designs have been tested for stability in winds over 80 km/h, we recommend exercising caution and using common sense under extreme wind and weather conditions. TUUCI recommends closing foldable shading systems when wind speeds exceed 40 km/h. Since gusts can reach much higher speeds (especially in storms), using a stable and heavy stand is crucial for safe operation. The stability of TUUCI shading products in strong winds and adverse weather depends directly on the size, weight, and safety of the stand, as well as the intended stability of the frame under the wind conditions. Please exercise caution and use common sense to determine when to close the umbrella. Please contact TUUCI customer service or the technical department if you require shading and stand systems that are guaranteed to withstand wind speeds over 40 km/h.

**Umbrella Stand**

BEFORE OPENING THE UMBRELLA, ALWAYS ENSURE THE CENTER MAST IS SECURELY ANCHORED IN THE STAND. Regularly clean the surface of the stand to maintain its attractive appearance. Use a mild cleaner, water, and a soft cloth or sponge for cleaning. Regularly check that the screws are securely fastened in the stand plate. If the stand is moved frequently, perform this check weekly.

Do not roll Aluma-Crete stands (aluminum stands filled with concrete) sideways, as this can damage the surface or coating. Touch up the surface of the stand as needed with outdoor-grade paint. You can order touch-up paint from TUUCI as a spare part. Mobile umbrella stands are designed for use on flat surfaces. Move the stand cautiously on uneven surfaces. Avoid rolling the base over steps or distances greater than 15 meters to prevent damage to the welded wheel suspension.

**Tuff-Skin Fabric, Curtains, and Tension Walls**

TUUCI's TUFF-SKIN umbrella fabrics are made from the toughest and most advanced fabrics and yarns used in the marine industry (including: Sunbrella Marine and Awning Fabrics, Weathermax, Ferrari Fabrics, Dickson Acrylic Fabrics, Weblon, Regatta, Gortex, and other proven high-quality, UV-resistant materials). TUUCI TUFF-SKINS should be cleaned regularly to prevent dirt accumulation that could become embedded in the fabric. The fabric can be cleaned directly on the frame. Simply brush off loose dirt. Rinse the fabric with a hose, and clean it with a warm mild soapy solution (max 38°C). Rinse the soapy solution thoroughly. Allow the fabric to air dry. Do not use aggressive cleaners.

For stubborn stains, use a mild soapy solution, adding 240ml of bleach to 4 liters of water. Treat the spot with a soft brush, sponge, or clean towel. Allow the fabric to air dry. This cleaning method may partially remove the waterproofing. If the umbrella needs to be

# Product information

water-resistant, treat it afterward with an air-drying water-repellent treatment (e.g., SM waterproofing).

Sunbrella® fabrics are machine washable but must be reproofed after washing to restore water resistance. Sunbrella® fabrics are made from 100% acrylic fibers. They are heat-sensitive and can melt at high temperatures. Do NOT wash or clean the fabric with excessively hot water, as the fabric may shrink. DO NOT USE A STEAM IRON OR HOT AIR DRYER; instead, allow the fabric to air dry. When storing the umbrella over the winter, clean the TUFF-SKIN fabric and allow it to air dry thoroughly, then store it in a clean, well-ventilated place. To extend the lifespan, use a TUUCI cover when the umbrella is not in use.

**about Tuuci**

For more than 25 years, TUUCI has been designing the most innovative and trendiest shading systems in the industry. Founded out of the passion of Dougan Clarke, TUUCI’s designs are inspired by boat building.

This means that all TUUCI umbrellas, lounges, and canopies are carefully crafted to perform in all circumstances. But that’s not all. With their unique style and beautiful design, they captivate as an unparalleled focal point.

See for yourself by exploring the diverse range. You will quickly realize that TUUCI is committed to creating the purest form of natural comfort: a pleasant place in the shade. With their exceptionally durable, 100% replaceable parts and exquisite design, TUUCI’s umbrellas, pavilions, and lounges offer a unique shading experience. TUUCI is present globally in the USA, Europe, East Asia, and South America. Their mission is to extend the shade that nature has already provided. TUUCI products are handcrafted and inspired by the marvelous forms and natural beauty of nature.

TUUCI uses environmentally friendly processes from manufacturing to recycling. In addition, TUUCI is deeply involved in the community by supporting dozens of non-profit organizations.

And that’s just the beginning. As you browse through the products, you will quickly realize that TUUCI is deeply committed to creating the purest form of natural comfort: a pleasant place in the shade.
