black matt RAL 9005

Cable suspension: black

Control optional:

Switchable

Casambi Bluetooth dimmable

Design: Aloys F. Gangkofner / Antje Cennet, mawa

Product description

Vesuvio pendant light - sculptural elegance in mouth-blown glass

The **Vesuvio pendant light** from the renowned **gangkofner edition** combines the art of hand-blown glass with iconic **mid-century design**. Its slightly conical, downward-opening shape gives it a sculptural presence and elegantly accentuates light - soft, atmospheric and expressive.

The mouth-blown glass body is created using the elaborate **triplex process** from three carefully combined layers of glass. This makes each lamp unique with character - subtle irregularities in color, glass thickness or air bubbles are evidence of genuine craftsmanship.

Stability is ensured by a **textile cable with steel core**, which is anchored in the glass holder and meets the highest visual and technical standards. The **translucent Makrolon feet** protect the glass and make it easy to move for cleaning or maintenance.

The **Vesuvio pendant luminaire** can be individually configured - choose **shape**, glass color, pendant color including canopy and the desired **total pendant length**. Ideal for design lovers, architects and stylish room concepts in both private and commercial settings.

About Mawa Design

Mawa Design was founded in 1977 by Martin Wallroth. In the company, which was then located in Kreuzberg, he developed and produced objects for the living area. In the following years, the one-man business expanded and established itself as a professional company. During this time, Mawa Design designs often took a pioneering role for formative ideas in the field of product design. To this day, the unusual combination of design office and manufactory contributes significantly to the company's success.

The eighties made understanding and interest in design popular. Mawa Design therefore broke new ground. In cooperation with external designers, product ideas for everyday life could be designed and quickly implemented due to the flexible structure of the company. The product range finds its customers mainly in the upscale retail trade.

In addition to the standard program of the manufactory, special productions according to individual specifications can of course also be realized. For example, luminaires have been produced for the Federal Chancellery, the Ministry of Economics, the Corbusier House, the Maxim Gorki Theater in Berlin or for the Luther House in Wittenberg. Renowned companies such as BMW, Daimler Benz, Jil Sander, Hotel Bleibtreu, KaDeWe, Sony or The Conran Shop work with Mawa Design when it comes to first-class lighting. Mawa products, which are characterized by high-quality materials and excellent workmanship, have been included in important collections of museums around the world.

Green light for further growth. With its own design department, research and development, as well as its own lighting laboratory, the company is now one of the preferred partners of internationally active specialist planners. mawa design has advanced from being an insider tip to a leading brand in the contract sector, especially in museums, libraries, sacred buildings and monuments with minimalist lighting tools. A new branding with a striking logo reflects the far-reaching importance of the company in the professional world. Here, too, the following applies to the design: less is more. And so in 2017, the brand name is also reduced to two syllables - mawa design becomes mawa. Only color and attitude remained unchanged green.
