Product description

Moonlight Lamp Hemisphere

The Moonlight as a hemisphere has the same light characteristics as the full sphere, with a slightly lower overall height. This makes it particularly suitable as a wall and floor lamp for indoor and outdoor use.

Due to the design, not all illuminants are compatible with the hemisphere. In order to achieve optimal illumination, please note our recommendations.

Product information

Details

Our versatile Moonlight globes are of moulded polyethylene. They are extremely impact resistant and robust. Temperatures of -40° to +80° Celsius do not cause any problems for our lights. The positive overall impression is topped off with additional features such as UV stability, longevity and watertightness.

Moonlight products are certified according to: CSA C 22.2 / UL 153 / EN 60598 / VDE 0711
Development, production and distribution according to DIN EN ISO 14001:1996

Cleaning & care

All Moonlights irrespective of their surface are easy to clean in general.
In case of strong soiling due to environmental influences such as soot, etc. we recommend using a special detergent which cleans the surface gently.

About Moonlight

Making people happy with atmospheric lighting

Moonlight luminaires captivate with their design, unique lighting atmosphere and the highest quality standards - made in Germany.

Unique interior and exterior lighting

The unmatched ambience and diffusion experience as outdoor and indoor lighting goes into a new round with a lot of passion. Be excited about the further development of the award-winning design. Through our years of experience designing with light, one thing remains the same: the high-quality appeal and virtually indestructible durability of Moonlight lighting.

Moonlight luminaires - lighting with excellent design

By using Moonlight luminaires in garden design, accentuated islands of light can be created that not only transform any garden into an atmospheric oasis, but also enhance the structural substance.
