Control optional:

Switchable

Casambi Bluetooth dimmable

Design: Aloys F. Gangkofner / Antje Cennet, mawa

## Product description

---

The **Bologna pendant light** from the exclusive **gangkofner edition** embodies mid-century design in its purest form. Its generous lantern silhouette is both impressive and understated - a statement for rooms that combine architectural clarity and atmospheric light. The hand-blown glass body is manufactured using the traditional triplex process, creating an extraordinary lighting effect with a soft, even radiance. Each lamp is unique and handmade with individual characteristics such as fine air bubbles or varying glass thickness - visible evidence of genuine craftsmanship. A looped textile cable with an internal steel core ensures stability and safety, while translucent Makrolon® feet protect the glass and make cleaning easy. Thanks to the modular system, the Bologna pendant luminaire can be individually configured - from the glass color to the pendant and canopy color to the overall length. This makes it a versatile design object for prestigious living and contract areas, combining elegance and functionality in perfect balance.

## About Mawa Design

---

# Product information

---

Mawa Design was founded in 1977 by Martin Wallroth. In the company, which was then located in Kreuzberg, he developed and produced objects for the living area. In the following years, the one-man business expanded and established itself as a professional company. During this time, Mawa Design designs often took a pioneering role for formative ideas in the field of product design. To this day, the unusual combination of design office and manufactory contributes significantly to the company's success.

The eighties made understanding and interest in design popular. Mawa Design therefore broke new ground. In cooperation with external designers, product ideas for everyday life could be designed and quickly implemented due to the flexible structure of the company. The product range finds its customers mainly in the upscale retail trade.

In addition to the standard program of the manufactory, special productions according to individual specifications can of course also be realized. For example, luminaires have been produced for the Federal Chancellery, the Ministry of Economics, the Corbusier House, the Maxim Gorki Theater in Berlin or for the Luther House in Wittenberg. Renowned companies such as BMW, Daimler Benz, Jil Sander, Hotel Bleibtreu, KaDeWe, Sony or The Conran Shop work with Mawa Design when it comes to first-class lighting. Mawa products, which are characterized by high-quality materials and excellent workmanship, have been included in important collections of museums around the world.

Green light for further growth. With its own design department, research and development, as well as its own lighting laboratory, the company is now one of the preferred partners of internationally active specialist planners. mawa design has advanced from being an insider tip to a leading brand in the contract sector, especially in museums, libraries, sacred buildings and monuments with minimalist lighting tools. A new branding with a striking logo reflects the far-reaching importance of the company in the professional world. Here, too, the following applies to the design: less is more. And so in 2017, the brand name is also reduced to two syllables - mawa design becomes mawa. Only color and attitude remained unchanged green.
