Canopy optional: small or large

Canopy color optional: white matt RAL 9016 or bronze

Design: Martin Wallroth

Delivery: INCLUDES illuminant

Product description

Berliner Ring 1 Up- and Downlight Pendant – double light effect for stylish spaces

The Berliner Ring 1 Up- and Downlight pendant from mawa design is more than just a luminaire – it is an architectural statement.

Unlike the pure downlight version, this model creates a unique combination of direct downward lighting and indirect upward illumination, achieving a harmonious balance between functional work light and atmospheric ambience.

Crafted from two discreet U-profiles joined along a shadow gap, the pendant appears both minimalist and elegant. Translucent strips ensure soft, glare-free and even light distribution, making it ideal for living areas, lounges, reception zones or prestigious interiors.

Available in four standard sizes (600, 800, 1000, 1200 mm), the Berliner Ring can also be tailored on request – from different radii to oval or linear variants, and even free forms. Both the light colour and suspension type (central or with steel cables) can be customised to suit specific projects.

This makes the Berliner Ring 1 Up- and Downlight the perfect choice for those who want to combine functional illumination with atmospheric design.

Note: Shown sizes and configurations are examples. Custom designs are available on request.

About Mawa Design

Mawa Design was founded in 1977 by Martin Wallroth. In the company, which was then located in Kreuzberg, he developed and produced objects for the living area. In the following years, the one-man business expanded and established itself as a professional company. During this time, Mawa Design designs often took a pioneering role for formative ideas in the field of product design. To this day, the unusual combination of design office and manufactory contributes significantly to the company's success.

The eighties made understanding and interest in design popular. Mawa Design therefore broke new ground. In cooperation with external designers, product ideas for everyday life could be designed and quickly implemented due to the flexible structure of the company. The product range finds its customers mainly in the upscale retail trade.

In addition to the standard program of the manufactory, special productions according to individual specifications can of course also be realized. For example, luminaires have been produced for the Federal Chancellery, the Ministry of Economics, the Corbusier House,

the Maxim Gorki Theater in Berlin or for the Luther House in Wittenberg. Renowned companies such as BMW, Daimler Benz, Jil Sander, Hotel Bleibtreu, KaDeWe, Sony or The Conran Shop work with Mawa Design when it comes to first-class lighting. Mawa products, which are characterized by high-quality materials and excellent workmanship, have been included in important collections of museums around the world.

Green light for further growth. With its own design department, research and development, as well as its own lighting laboratory, the company is now one of the preferred partners of internationally active specialist planners. mawa design has advanced from being an insider tip to a leading brand in the contract sector, especially in museums, libraries, sacred buildings and monuments with minimalist lighting tools. A new branding with a striking logo reflects the far-reaching importance of the company in the professional world. Here, too, the following applies to the design: less is more. And so in 2017, the brand name is also reduced to two syllables - mawa design becomes mawa. Only color and attitude remained unchanged green.
