Cable: gray braided cable All dimensions and technical specifications refer to a single module; this can be combined with other modules to create linear, square or free forms.

Design: Hermann August Weizenegger

Delivery: INCLUDES illuminant

Product information

Product description

Porto Pendant Lighting System by mawa – Flexible Design for Individual Room Solutions

The porto pendant light, designed by Hermann August Weizenegger and realized by mawa, answers the question: How can a lighting system adapt to complex spatial situations? The result is a highly innovative luminaire that asserts itself confidently in both living and working environments.

The housing, precision-milled from a single piece of aluminum, is refined with elegant accents in brushed brass or stainless steel. Using advanced manufacturing techniques, the outer shell is bent, folded, and seamlessly assembled – a clear statement of high-quality craftsmanship “Made in Germany”.

What makes porto especially versatile is its modular concept: thanks to integrated hinges, the system can be arranged linearly, circularly, or in free shapes. The base luminaire can be extended with up to five additional modules, creating individual lighting landscapes perfectly tailored to different room architectures.

With its unique combination of aesthetic design, technical precision, and modular flexibility, porto offers countless possibilities for customized lighting concepts – from private living spaces to large-scale projects.

About Mawa Design

Mawa Design was founded in 1977 by Martin Wallroth. In the company, which was then located in Kreuzberg, he developed and produced objects for the living area. In the following years, the one-man business expanded and established itself as a professional company. During this time, Mawa Design designs often took a pioneering role for formative ideas in the field of product design. To this day, the unusual combination of design office and manufactory contributes significantly to the company's success.

The eighties made understanding and interest in design popular. Mawa Design therefore broke new ground. In cooperation with external designers, product ideas for everyday life could be designed and quickly implemented due to the flexible structure of the company. The product range finds its customers mainly in the upscale retail trade.

In addition to the standard program of the manufactory, special productions according to individual specifications can of course also be realized. For example, luminaires have been produced for the Federal Chancellery, the Ministry of Economics, the Corbusier House, the Maxim Gorki Theater in Berlin or for the Luther House in Wittenberg. Renowned companies such as BMW, Daimler Benz, Jil Sander, Hotel Bleibtreu, KaDeWe, Sony or The Conran Shop work with Mawa Design when it comes to first-class lighting. Mawa products, which are characterized by high-quality materials and excellent workmanship, have been included in important collections of museums around the world.

Green light for further growth. With its own design department, research and development, as well as its own lighting laboratory, the company is now one of the preferred partners of internationally active specialist planners. mawa design has advanced from being an insider tip to a leading brand in the contract sector, especially in museums, libraries, sacred buildings and monuments with minimalist lighting tools. A new branding with a striking logo reflects the far-reaching importance of the company in the professional world. Here, too, the following applies to the design: less is more. And so in 2017, the brand name is also reduced to two syllables - mawa design becomes mawa. Only color and attitude remained unchanged green.
