Control: **Phase on & off dimmable** (2700 - 3000 - 4000 Kelvin): Power cable 3-core

Optional color: See color selection

Special feature: Spotlight can be rotated 365° and tilted 90

Available accessories: Heat sink: Black as standard. White oxide ceramic coating on request

Design: Jan Dinnebier & MAWA

Product description

Product information

The Wittenberg 4.0 Zoom luminaires expand the well-known MAWA series with a precise solution for variable accent and area lighting. They are perfectly suited for living spaces, offices, galleries, exhibitions, and retail areas – wherever light needs to be used in a targeted way.

By rotating the focusing ring, the beam angle can be continuously adjusted between 20° and 50°, making it ideal for optimally illuminating objects of different sizes and shapes. This creates an exceptionally wide range of applications, from precise accentuation to uniform ambient lighting – always with the highest light quality and energy efficiency.

The light head features a large, well-shielded light-emitting surface and can be tilted 90° and rotated 365°, allowing easy and flexible alignment to ceiling, wall, or object.

The surface is powder-coated as standard in matte white (RAL 9016) or matte black (RAL 9005). On request, MAWA manufactures custom-made special solutions.
