Included in the scope of delivery: **Honeycomb louvre:** Provides targeted glare control for the spotlights in the Wittenberg 4.0 series

Product description

Product information

Wittenberg 4.0
STANDLIGHT "druff

The wittenberg 4.0 floor lamp druff goes "in" in the socket and "on" on the shelf. The spotlights are suitable for indirect glare-free basic lighting by directing both light heads onto the room wall or ceiling. In particular, pictures, exhibits and other furnishings can be accentuated with light in a targeted manner. Like a table lamp is druff can be placed flexibly without installation effort thanks to 2.30 m long cable.
