Housse de protection en polyester, gris foncé

Particularité : 5 ans de garantie du fabricant sur la structure et 15 ans sur la toile si les instructions d'entretien Tuuci sont respectées.

## Description du produit

---

Le Ocean Master MEGA MAX Classic de TUUCI est un parasol haut de gamme conçu pour les grands espaces extérieurs exigeants. Avec une envergure de 4,9 × 4,9 mètres, il associe design élégant, ingénierie avancée et stabilité exceptionnelle. Ce modèle a été spécialement développé pour un usage professionnel et convient parfaitement aux hôtels, restaurants, établissements éducatifs ainsi qu'aux projets privés prestigieux.

### Robustesse et Durabilité

Le mât robuste de 13,3 cm avec extrusion à quatre canaux en aluminium marin assure une stabilité maximale. Le parasol résiste à des vitesses de vent allant jusqu'à 72 km/h et supporte des rafales jusqu'à 120 km/h. Grâce à sa conception nécessitant peu d'entretien, le MEGA MAX se distingue par une durée de vie prolongée, réduisant ainsi l'impact environnemental.

### Précision dans les Détails

Le design breveté Vision Hub en acier inoxydable garantit une durabilité maximale et une silhouette élégante. Les baleines de 5,1 cm de diamètre offrent une stabilité renforcée et soutiennent solidement la large toile. Chaque composant est conçu pour la longévité et la résistance.

### Utilisation Pratique

Le mât télescopique intégré permet une ouverture et une fermeture sans effort au-dessus du mobilier. Le système EasyDrive avec manivelle et mécanisme de broche auto-lubrifiant assure une manipulation fluide, même pour cette taille exceptionnelle.

### Options Personnalisées

Pour plus de confort, le MEGA MAX peut être équipé de l'éclairage LED Ambia (réglable, éclairage haut et bas) ou de puissants chauffages infrarouges. Il transforme ainsi tout espace extérieur en un lieu exclusif, quelle que soit l'heure ou la saison. Le TUUCI Ocean Master MEGA MAX Classic 4,9 × 4,9 m est le choix idéal pour les projets exigeant les plus hauts standards de qualité, de fonctionnalité et de design.
