Gabionen-Schirmständer mit Sitzfunktion. HPL-Sitzauflage. Sitzhöhe 54 oder 84 cm.

### Colori e disegni del tessuto

---

#### Tessuto per tende da sole in acrilico Premium:

Il tessuto per tende da sole in acrilico di alta qualità è realizzato al 100% in acrilico di marca tinto in massa. A differenza della tradizionale tintura del filato, i pigmenti colorati vengono integrati direttamente durante il processo di produzione delle fibre. Questo garantisce una protezione particolarmente affidabile contro i raggi UV nocivi, assicurando al tempo stesso colori brillanti, durevoli e resistenti alla luce.

Il robusto tessuto in acrilico si distingue inoltre per l'elevata resistenza allo strappo. Uno speciale trattamento protettivo rende il materiale idrorepellente e antimacchia. Ciò lo rende una soluzione affidabile e duratura per l'utilizzo prolungato in ambienti esterni.

#### Specifiche del tessuto

- Impermeabilità 300 – 460 mm colonna d'acqua, EN 20811
- Elevata solidità del colore e resistenza agli agenti atmosferici (7 – 8 su 8)
- Idrorepellente e antimacchia

# Informazioni sul prodotto

---

- 100% acrilico 285 – 300 g/m<sup>2</sup>
- Possibilità di stampa personalizzata su copertura e balza

**Molti tessuti sono disponibili anche nella qualità All Weather. Impermeabili fino a 1000 mm di colonna d'acqua, EN 20811.**

## **Acrilico Premium ProNature:**

Con Acryl ProNature, CARAVITA presenta una variante innovativa di tessuto con un valore aggiunto speciale: uno speciale trattamento contribuisce attivamente al miglioramento della qualità dell'aria. Attraverso un processo di fotocatalisi, vengono ridotti inquinanti come ossidi di azoto, ossidi di zolfo e composti organici, neutralizzando allo stesso tempo gli odori sgradevoli.

In questo modo si ottiene un contributo concreto a una maggiore qualità della vita sostenibile negli spazi esterni. Per quanto riguarda resistenza, durata e caratteristiche tecniche, Acryl ProNature corrisponde pienamente al collaudato tessuto acrilico classico.

- Impermeabilità 300 – 370 mm colonna d'acqua, EN 20811
- Elevata solidità del colore e resistenza agli agenti atmosferici (7 – 8 su 8)
- Idrorepellente e antimacchia
- 100% acrilico 285 – 300 g/m<sup>2</sup>
- Possibilità di stampa personalizzata su copertura e balza

## **Tempoteststar FR:**

La collezione di tessuti Tempoteststar di PÀRA è composta da un materiale ignifugo certificato secondo la riconosciuta classe di protezione antincendio B1. Il poliestere di alta qualità, tinto in massa al 100%, è disponibile in un'ampia gamma di colori ed è particolarmente indicato per applicazioni in cui la protezione antincendio riveste un ruolo centrale.

- Ignifugo, classe di protezione antincendio B1 (DIN 4102)
- Resistente a olio, acqua e sporco
- Elevata solidità del colore e resistenza agli agenti atmosferici (7 – 8 su 8, DIN EN ISO 105 B04)
- Impermeabilità 280 – 300 mm colonna d'acqua, UNI EN 20811
- 100% poliestere tinto in massa 300 g/m<sup>2</sup>

## **Ferrari Precontraint 302**

Questa membrana di protezione solare rivestita in PVC si distingue per l'eccezionale robustezza e resistenza. È completamente impermeabile e soddisfa elevati requisiti di ignifugazione – caratteristiche che si rivelano particolarmente preziose negli ambienti esterni più esigenti.

- Non adatto ai modelli Big Ben Freestyle, Belvedere, Grande
  - Ignifugo, classe di protezione antincendio B1 (DIN 4102)
  - Tessuto in poliestere con rivestimento in PVC
  - Completamente impermeabile
  - Antimacchia
-

- Peso superficiale 480 g/m<sup>2</sup>
- Possibilità di stampa personalizzata su copertura e balza

## Descrizione del prodotto

---

### Il classico - semplice, leggero e mobile!

Primus convince per la sua maneggevolezza e la semplice tecnologia di trazione a corda. Questo rende l'ombrellone leggero e mobile. Alle bancarelle del mercato, alle vendite e agli eventi informativi, questa mobilità è un must, a casa in terrazza una piacevole caratteristica. Primus si monta e si smonta rapidamente e ci segue quando ci spostiamo in un altro angolo accogliente del giardino in una calda giornata estiva.

#### PRIMUS:

- Tessuto per tende da sole di qualità superiore. Altri tessuti high-tech per esterni disponibili a pagamento.
- Robusta struttura in alluminio con palo da 50 mm (spessore parete 3 mm) e montanti da 30x15x2 mm.
- Telaio in bianco RAL 9016, grigio antracite RAL 7016, marrone nocciola RAL 8011, anodizzato lucido o argento.
- Cornici in altri colori RAL a pagamento.
- Corona in plastica resistente agli urti e stabilizzata ai raggi UV, bianca o grigio antracite.
- Estrazione del cavo integrata
- Include una copertura protettiva in poliestere grigio

## Opzioni & Accessori

---

### Tetto antivento e cappuccio antivento:

**Cappuccio antivento:** Cucito sulla copertura, si solleva con il vento riducendo la pressione.

**Tetto antivento:** Con struttura aggiuntiva. Migliora estetica e resistenza al vento. Permette la fuoriuscita del calore.

### Tipi di balza:

**Balza fluida:** Transizione senza bordo visibile. Si muove con il vento.

**Balza applicata:** Bordo visibile. Parti laterali unite, meno movimento.

**Copertura protettiva in PVC** (grigio chiaro)

**Copertura protettiva in acrilico** (grigio chiaro o colore del telo)

**Asta per copertura:** Asta telescopica per un uso più semplice.

**Protezione palo:** Altezza 90 cm, imbottitura 4 cm, fissaggio a velcro.

### Protezione base

**Accessori come riscaldatori, illuminazione integrata e motori disponibili per la serie BIG BEN.**

## Informazioni su Caravita

---

CARAVITA è un marchio leader nel settore degli ombrelloni e delle vele da sole di alta qualità ed è sinonimo di qualità e design. Con campate fino a sette metri, i nobili ombrelloni di grandi dimensioni creano spazio per tutti gli usi possibili e, grazie a una struttura eccezionalmente robusta, resistono anche a carichi di vento elevati. Meccanismi innovativi aprono ogni dimensione di ombrellone con la stessa fluidità del primo giorno, anche dopo anni di utilizzo, e assicurano una gestione facile e confortevole. Gli ombrelloni CARAVITA sono caratterizzati da una lavorazione artigianale personalizzata. L'intera selezione di colori del tessuto e del telaio può essere combinata individualmente. Questo garantisce - in combinazione con molti altri brillanti extra - la soddisfazione delle più alte esigenze nella gastronomia, nell'industria alberghiera e nel giardino privato.

- Design individuale: oltre 130 colori di tessuto e 200 colori di telaio in base alle esigenze del cliente.
- Prodotti durevoli: Grazie ai componenti in alluminio e acciaio inox di alta qualità
- Meccanica innovativa: Assicura un funzionamento regolare per anni
- Elevata stabilità: grazie allo spessore delle pareti del palo e dei montanti superiore alla media
- Forme speciali su misura con il Big Ben Freestyle

Lo spazio abitativo cresce all'aperto. Mangiare, bere, festeggiare, ridere o lavorare all'aperto: non ci sono limiti all'individualità. Non importa se sul balcone privato o sull'accogliente terrazza del ristorante. Già in primavera, quando i primi caldi raggi di sole invogliano a uscire, le persone vogliono godere di un ulteriore comfort. Prodotti di tendenza ben studiati nel campo della protezione solare sono indispensabili per il tempo libero nel verde. Solo così è possibile creare nuovi luoghi preferiti e rendere la vita all'aperto un piacere per tutto l'anno.

- Ombrelloni fuori dagli schemi? Non per CARAVITA. Anche le vostre esigenze e i vostri bisogni sono molto individuali. Ecco perché ogni ombrellone è realizzato su misura. Scoprite voi stessi come, con oltre 30 anni di esperienza e tanta passione, viene creato un ombrellone di alta qualità.
